

Clock Mechanism Instructions

1. Put rubber washer on shaft of clock device.
2. Insert clock device through back of clock face.
3. Put gold washer over clock's shaft.
4. Screw on large gold nut.
5. Remove protective plastic from the hour hand, and press in place. (This is a very tight fit, and takes some practice.)
6. Remove protective plastic from the minute hand, and put minute hand over the clock shaft. Note- the minute hand will fit on the oval shaped part of the clock shaft.
7. Apply the small lock nut.
8. Press on the Sweep Hand.
9. Adjust each hand so that they are straight (parallel) with the clock face.
10. Insert an AA battery to verify clock works correctly. (Battery not included)
