New Glassware Products from LRi

SKOKIE, ILLINOIS – LRi is pleased to announce the addition of several new glassware products to its dye-sub line, including a few that are unique to LRi.

Our 16-ounce glass stein has been an industry favorite for years, but now you have the option of either our traditional frost finish, or our new white imprintable panel. Likewise, we've added a white panel and a fancy, ornamental gold rim to our 1.5 ounce shot glass.

And completely new to our line are authentic pint glasses, with either a frost finish or white imprintable panel;

This traditional glassware takes on a whole new level of versatility with the vibrant colors possible on the white panel. Images on the panel come out exceptionally crisp and colorful. These bar glasses can be customized for any occasion or beverage.
