PRODUCT ANNOUNCEMENT

SKOKIE, ILLINOIS - LRI, a leading manufacturer of dye-sub blanks, has added two new travel mugs to its extensive line of blank imprintable products.

First up is an all-white, stainless steel travel mug in the standard, 14-ounce size that fits all automobile mug holders. Its double-wall construction keeps liquids hot or cold, as well as solidly contained over laps or desktops! The lid is simple to open and close, the handle is easy to grip and the mug cleans safely in a dishwasher. Mugs are FDA approved. Each is individually boxed and requires a mug press.

Our porcelain Eco-Tumbler is a classy, 12-ounce travel mug just like those seen in gourmet-coffee shops. It comes with a safety warning embossed on its snug, white silicon lid, which seals tightly to prevent spills. This one also can be safely cleaned in a dishwasher, is FDA approved and comes individually boxed. An UltraWrap™ must be used for pressing.

LRI, in business for more than 30 years, also is a supplier of dye-sub inks, systems, supplies, equipment, and custom coating services.
